Metric / Imperial **Signal Map** **Signal Score** **GPS** **Compass**

Signal Strength Map - green is good signal, orange is fair, red is poor and purple is very poor. It calculates signal strength based on the connection to the remote - it searches for signal loss based on minor signal interruptions:

GENERAL

POWER

SENSORS

CONTROLS

WIND

[Download color coded Signal Strength KML](#)

	Flight time	Altitude	Home Distance	Minor Signal Errors
A	00m 30s	11.6 m	0 m	59.3
B	01m 00s	18.9 m	24 m	31.7
